- Our innovative Award Winning product provides fast warm up time

MAINTENANCE FREE

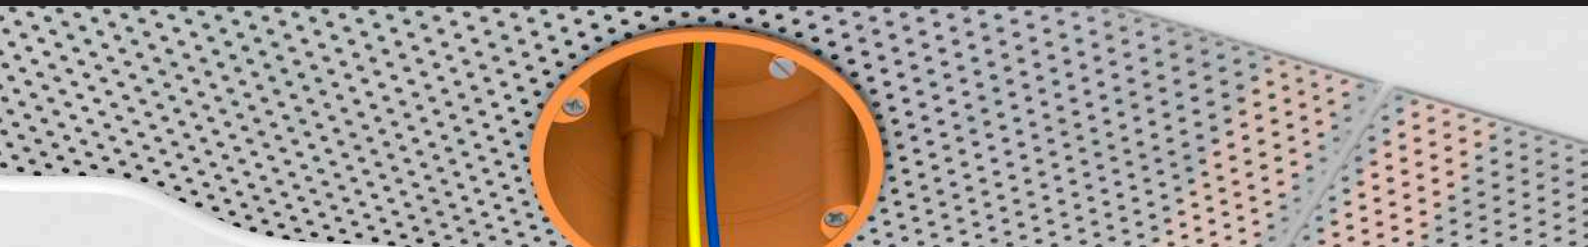

- No routine maintenance or damage to buildings from leaking pipes

TUV CERT + 10 YR WARRANTY

- Safe 36/24 V AC system requires no earth and completely safe. German Manufacturer.

RENEWABLE ENERGY READY

- Fully compatible with solar and energy storage systems with the possibility of even more savings to the property owner

SAY GOODBYE TO RADIATORS WITH OUR SURFACE INFRARED HEATING SOLUTIONS

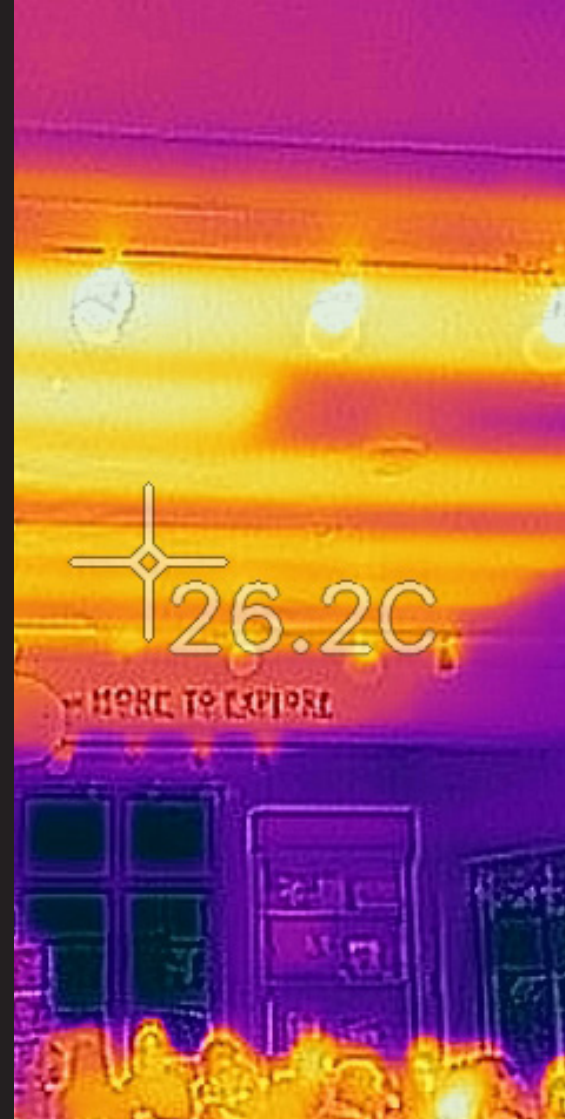

ASTECherm Heating Benefits

Heating from above - gives uninterrupted heat source emulating the natural heat we enjoy from the sun with the added bonus of not having to design your rooms around radiators.

Ceiling installation guarantees excellent, consistent distribution of the **radiant heat**. The surface can be painted or wallpapered after plastering.

Invisible heating - becomes part of the fabric of the building reducing ceiling height losses to a few mm compared to underfloor heating which can be up to 6 inches.

Reduces condensation inhibiting mould growth and pathogens.
